Dr Levine is a medical oncologist who has been in clinical practice and conducting clinical research for the past 35 years. His areas of interest are cancer clinical trials and health services research. In June 2016, he received the Order of Canada which recognizes outstanding achievement, dedication to the community and service to the nation for his research which has changed care. While at Warwick University he will pursue research in: 1) patterns of practice in locally advanced breast cancer, and 2) treatment of cancer patients with venous thrombosis.

A number of free events will be hosted by WMS, UHCW and West Midlands Academic Breast Group during their visit, addressing themes related to novel treatments for breast cancer.
