PhD Studentship
Dr Rachel O’Reilly

**PhD project:** Functional polymeric nanostructures

**Supervisors:** Dr Rachel O’Reilly

**Project description:**
A PhD studentship is available from October 2013 in the group led by Dr Rachel O’Reilly studying the synthesis of well-defined polymers using living polymerisations (including RAFT and ROP) and templating methods. The project will involve small molecule and polymer synthesis as well as extensive polymer and material characterisation.

**Requirements:**
Applicants should have (or be about to receive) an honours degree (at least II.1 or equivalent and a Master’s degree is preferred) in chemistry, or other relevant discipline, and should have experience with organic and/or polymer synthesis and characterization. This studentship is only provides funding for UK/EU students.

**How to apply:**
Please see the O’Reilly group website for more details
