PhD Studentship
Professor Rachel O’Reilly

PhD project: Synthesis of novel biomimetic polymers and their subsequent self-assembly
Supervisor: Professor Rachel O’Reilly
Deadline: Wednesday 16th November 2016

Project description:
A PhD studentship is available from October 2017 (or earlier if available) in the group led by Professor Rachel O’Reilly studying the synthesis of novel biomimetic polymers and their subsequent self-assembly. The project will involve significant organic synthesis and established polymer synthesis as well as extensive polymer and materials characterisation.

Requirements:
Applicants should have (or be about to receive) an honours degree (at least II.1 or equivalent and a Masters degree is preferred) in chemistry, or other relevant discipline, and should have experience with organic and/or polymer synthesis and characterization. This studentship only provides funding for UK/EU students and funding is provided for 3.5 years.

How to apply:
Please see the O’Reilly group website for more details
