Resources and Preparation

Create a Flow Chart for some simple dance moves in presentation software.

Session Outline

Show the students the Flow Chart and explain how it works.

Ask the class to stand up and act out the dance moves.

You may wish to clap out a beat to make it a bit easier for the students!

Extension:

Try some more complex Flow Charts or get the students to make up their own and try them on a partner.

This resource will support the engagement of Girls in the lesson.
