Reference and Bibliography Database on Research and Development with Pultruded Fibre Reinforced Polymer Shapes and Systems

Compiler: Professor J. Toby Mottram email: J.T.Mottram@warwick.ac.uk
Address: School of Engineering, University of Warwick, Coventry, CV4 7AL, UK.

?? - Incomplete details

Date: 01/12/16

This publication database is for publications on research and development towards the application of pultruded Fibre Reinforced Polymer (PFRP) shapes and systems in civil engineering works. Details of papers in a conference proceeding may be incomplete. The database does not include publications for retrofitting and repair, rebars or dowels in reinforced concrete and process engineering.

References in the 13 categories are listed in alphabetical order by first author’s surname and then year of publication.

Every effort is made to accurately record a publication’s details so that you can obtain a copy. The compiler cannot be responsible for any errors in the listings.

Information for new publications or/and revisions shall be gratefully received, and the database will be updated for the next month.
