

Extra problems: Linear simultaneous equations

Solve the following simultaneous equations:

(A) $4x + y = 9$
 $3x = 6$

(B) $x + y = 8$
 $x - 2y = -1$

(C) $4x + 2y = 10$
 $y + x = 3$

(D) $x + y + z = 9$
 $x + 2y + z = 12$
 $2x + y - z = -3$
