Are you a Black woman working in STEM?

Are you at PhD level or over?

What is scientific life like for you? What are the positives? What are the negatives? What advice would you give to Black girls choosing a career in STEM?

We’re looking for volunteers to interview about their experiences in STEM.

Date, time, and place can be set to best suit you.

For more information, check out the project on: http://katherinejanececil.com/join-the-conversation/

Or contact katherine: katherine.cecil.15@ucl.ac.uk
