

**The Energy GRP invites you to an evening seminar:**

**Michael Boxwell**

**Innovator, Author and  
Technical Consultant**

## **Creating Innovation within the Energy Sector**

**Date: Wednesday 26th April 2017**

**Time: 5:00pm – *Talk will be followed by networking drinks reception***

**Location: Room MS.03 Zeeman Building, University of  
Warwick**

Michael Boxwell is a natural innovator. He worked on the project team that developed the first Windows-based smart phone, was the first to use lithium-ion batteries in a laptop computer, worked on electric vehicle programmes since 2003 and has been developing next generation technology ever since. Most recently, Michael developed the Battery LITE energy storage system – the best-selling residential solar battery storage systems in the UK.

He is the author of several books including the best-selling *Solar Electricity Handbook*, which has sold almost 100,000 copies and is used by Universities worldwide, to teach about renewable energy.

**Registration required for catering purposes:**
