

Correct use of Abrasive Wheels

DO's

Before starting

- Check the correct speed rated wheel is used
- Ensure guard is correctly located and used
- Ensure tool rest is correctly adjusted
- Check that emergency stop devices operate
- Wear goggles, hearing protection and any other specified personal protection
- Ensure long hair is securely tied back
- Keep work area clean

Report any defects promptly

DONT'S

- Never wear ties, loose clothing or jewellery when using rotating machinery
- Never use defective or worn wheel
- Never forcibly stop a rotating wheel
- Never use the equipment without the guarding in place

Only trained operators can use the machine. You must be authorised to change the wheel.
