enables graphics but can be less secure

.complexity.warwick.ac.uk

For an up-to-date list, open a linux terminal and type:
:-> nmap -sP 137.205.23.34/24 | grep complexity

No queing, run programs directly, but ALWAYS "nice" your programs to stop them paralysing the computer:

~~:-> ./a.out
:-> R
:-> python
:-> module load matlab
:-> matlab~~

:-> nice -n 18 ./a.out
:-> nice -n 18 R
:-> nice -n 18 python
:-> module load matlab
:-> nice -n 18 matlab

To check programs currently running type "htop"

For really large jobs (> 20 cores/2 days)
use the COW and the taskfarm
