

# Research Technology Platforms (RTPs) & Warwick Scientific Services (WSS)

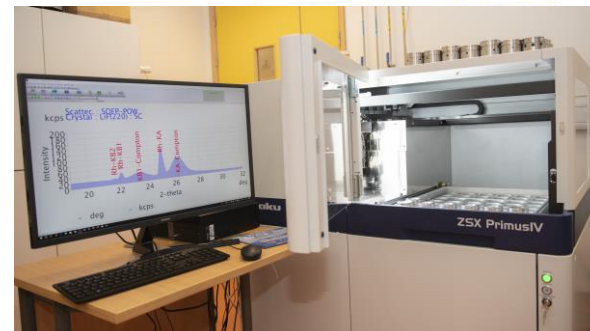

RTPs are our key research infrastructure that underpin the research at Warwick.

8 platforms: Advanced Bioimaging, BSU, Electron Microscopy, Polymer Characterisation, Proteomics, Scientific Computing, Spectroscopy, and X-ray Diffraction.

Significant investment in new capabilities and refreshing key equipment.

Dedicated technical experts that frequently work directly with industry.

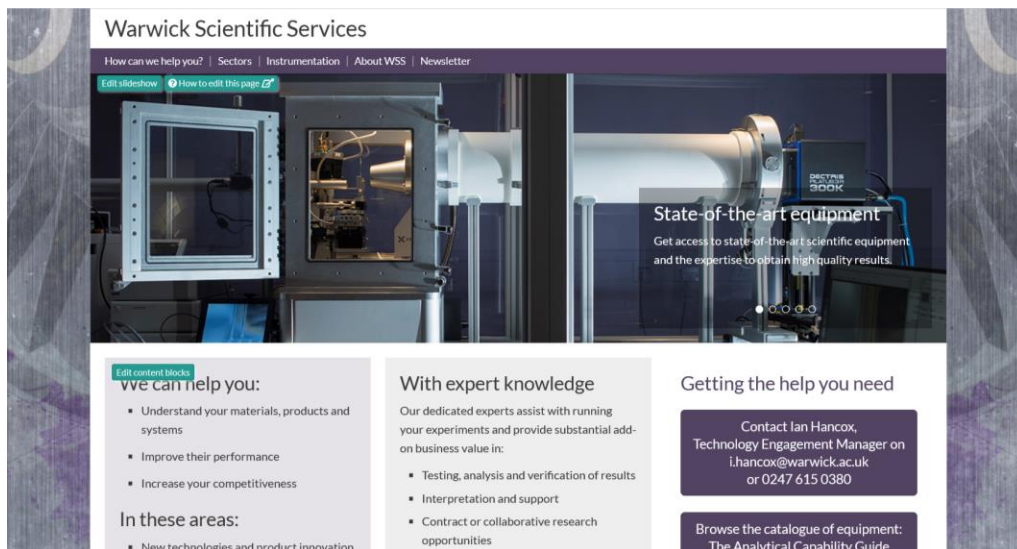

Collaborate with many of the Departmental and National facilities here at Warwick.

# How to access the RTPs and Warwick's Analytical Equipment

A dedicated online booking system for accessing the analytical techniques and expertise at Warwick

**State-of-the-art equipment**  
Get access to state-of-the-art scientific equipment and the expertise to obtain high quality results.

**We can help you:**

- Understand your materials, products and systems
- Improve their performance
- Increase your competitiveness

**In these areas:**

- New technologies and product innovation

**With expert knowledge**  
Our dedicated experts assist with running your experiments and provide substantial add-on business value in:

- Testing, analysis and verification of results
- Interpretation and support
- Contract or collaborative research opportunities

**Getting the help you need**
