

# Who's Challenging Who?

## What is Who's Challenging Who?

We have developed a half day training course to help social care staff understand the perspective and experiences of people with a learning disability whose behaviour has been labelled as challenging.

## Who are we recruiting?

Residential settings supporting up to ten adults with LD with at least one adult who has behaviour labelled as challenging.

## What does it involve?

A manager or senior staff member, and one additional member of staff will be invited to attend the training. We will ask both staff members to complete questionnaires before and after the training, to monitor the impact of the training on empathy and attitudes towards adults with a learning disability and challenging behaviour.
