- **£1.9bn**
  - Supported 24,000 jobs and generated £1.9 billion GVA in the UK
  - Supported 17,900 jobs and generated £1 billion GVA in the West Midlands
  - Supported 14,400 jobs and generated £784 million GVA in Coventry and Warwickshire LEP

- **£59m**
  - Between 2010 and 2020, the University will invest an average of £59 million each year in capital projects which will support 600 jobs

- Employed 5,221 FTE staff

- Educated over 25,000 students

- Trained 121 teachers through the Centre for Professional Education, 50% of whom took jobs in Coventry and Warwickshire and Solihull, and taught 300 part-time educational leadership/innovation students

- Trained 560 doctors and 31 allied health professionals through Warwick Medical School

- Was a driver of economic development through industrial partnerships at WMG (Warwick Manufacturing Group) and a range of other departments

- Almost a quarter of our graduates remain in the West Midlands after graduation with 14% of these graduates in Coventry and Warwickshire

- In 2015/16, Warwick Volunteers worked in 46 schools in Coventry, Kenilworth, Leamington Spa and Warwick
We’re committed to supporting our region and its businesses, from SMEs and local start-ups to larger corporates.

WMG is building the National Automotive Innovation Centre (NAIC), as part of a long-term commitment with Jaguar Land Rover and Tata Motors European Technical Centre. The centre will enable academic and industrial teams to work together to develop breakthroughs in the automotive industry.

We’re making a positive impact on skills development throughout our region with our executive education delivered by Warwick Business School, whose MBA has been ranked number one in the UK by The Economist. Following the success of our WMG Academy for Young Engineers in Coventry we’ve just opened another in Solihull, equipping even more of the region’s students with technical skills for employment or Higher Education through an innovative learning environment. The Graduate Market 2017 named us the university visited by the largest number of the UK’s top graduate employers.

We’re championing the region’s economic and cultural growth through our work with local councils and other public and community services. We’re also working with Coventry City Council and Coventry University to support Coventry’s bid to be the City of Culture for 2021, leading on place-based research and developing the new 10-year cultural strategy for the city. We support cultural engagement in the local area through events, performances and community-led productions at Warwick Arts Centre, the largest arts centre outside of London. Over three quarters of the Arts Centre’s audience comes from within a 45-minute drive catchment area.

Championing and investing in sustainability, we recognise that we have a responsibility for the protection of the region’s environment and encourage our staff, students and visitors to help us excel in this area, through green initiatives and targets.

Our services for SMEs are tailored to suit the company’s need, and our experts can assist with graduate recruitment and skills, advice and support on finance and incubation, research and development and knowledge transfer. The University of Warwick’s Science Park also manages the Minerva network of business angels, who provide angel investment to start-ups in need of funding.

Talk to Warwick’s advisors to find out more about our impact on the region, and how we can work together to support it.
